Md. Mohiuddin

Software Engineer | Odoo Developer
Bangladesh

Summary

I have been working as a Software Engineer for 3 years in many different technologies like Python3, PHP, NodeJS, ReactJS, PostgreSQL, MySQL and so many others.

But I am not limited to any specific technology stack because it has very little learning overhead. The most important thing is solving the business problem considering the constraints.

I write clean, efficient and reusable code considering different corner cases. I can take responsibility for any task and work on tasks individually without bothering anyone. But I think I am a very good teammate to any team I work in. I often share my learning and discoveries with my teammates and help them with what I have.

I like to find bugs in existing codes and improve efficiencies in slow performing systems. For example, there was a data synchronizer in one of our systems which would take 2-3 hours. But we have no memory constraints. So I used dynamic programming with some more space and database indexing as we would perform searching on it frequently which reduced our time to 2-3 minutes only.

I have experience in designing efficient relational database schema following normalization. I have seen many examples of very good database designs and worst use of it. So, I remain careful about this.

I like to read whether it is code or documentation because reading official documentation and books and codes is always faster than stumbling on and being hooked up hours to unusual behavior of the system.

I am a learner forever with a curious mind inside me because these help us to reveal the amazing discoveries of our life.

Experience

Strativ AB

Software Engineer

March 2025 - Present (1 year 5 months)

Dhaka, Bangladesh

- Worked on Most of the Human Resource Modules, customized and developed based on requirements. For example, Payroll, Time Off, Attendance, Employees, Employee Contracts etc.
- Wrote clean, easy to maintain code following SOLID Principles especially, Single Responsibility Principle
- Increased test coverage of existing features
- Applied TDD (Test Driven Development) in newly developed features
- Prepared Solution plan before development and added documentations
- Implemented access rights for proper data access

Metamorphosis

Software Engineer

October 2022 - February 2025 (2 years 5 months)

Dhaka, Bangladesh

- Migrated Odoo 13 to Odoo 17
- Customized client requirements with Odoo modules. For example, Accounting, Point Of Sale, Ecommerce etc.
- Integrated Odoo with Mobile apps through REST APIs.
- Efficient database design and finding bottlenecks of different slow performing codes. For example, in a system it was taking a very long time (around 2 hours) to update a system. We optimized it to 2 minutes using database indexing and dynamic programming.
- Maintained and Refactored Supply Chain management systems for one of largest Chemical Companies in Bangladesh

Desktop IT

Full Stack Developer

September 2021 - May 2022 (9 months)

Rajshahi, Bangladesh

Spring Rain Pvt Ltd

Full Stack Developer

April 2021 - July 2021 (4 months)

Bangladesh

Education

University of Rajshahi , Bangladesh

B.Sc. (Engineering) , Information and Communication Engineering · (February 2016 - September 2020)

Sardah College, Rajshahi, Bangladesh.

Higher Secondary School Certificate (HSC), Science · (2013 - 2014)

Sardah Government Pilot High School, Rajshahi, Bangladesh.

Secondary School Certificate, Science · (2011 - 2012)
